## Search fails in Cataloging when SHED suppressed

- **Article Type:** General
  - **Product:** Voyager
  - **Product Version:** 8.2.0
- 

### Problem Symptoms:

\* "The search failed" when finding See references from authority browse if SHED is Staff Suppressed

### Cause:

Known issue 16384-20433.

### Resolution:

Issue 16384-20433 is currently in Development.

---

## Additional Information

### Replication steps:

1. In System Administration > Search > Indexes ? Headings and Left-Anchored > SHED > Edit, check ?Staff Suppress?
2. Save.
3. In Cataloging, find a bib record and add a subject heading that does not have an authority record in the database.
4. Use Ctrl+H to validate.
5. Find a Reference in the Browse list presented.
6. Highlight and click Authority.
7. Choose the See reference in the resulting pop-up and click Do Search.
8. Receive message: ?The search failed.?

Workaround: Uncheck Staff Suppress in System Administration > Search > Indexes - Headings and Left-Anchored > SHED.
