

Notices sent for items already discharged

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.1.2
-

Problem Symptoms:

* Some items on overdue notices were turned in and cleared from the system

Cause:

Notices are not processed in Reporter daily.

Resolution:

Process notices on a daily basis.

Additional Information

Notices accumulate in an .inp file on the server until you process them in Reporter. This is not a dynamic file -- notices simply accumulate here until processed. If notices are not processed daily, some notices may be obsolete/unnecessary by the time they're processed and printed/emailed.
