
In OPAC: "The base / library you request for is locked"

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

In OPAC: "The base / library you request for is locked.", for example, for the base "XXX03" ("E-Books and E-Journals"), when, in fact, the xxx03 library is not locked.

Cause:

The "XXX03" base did not appear in the util h/1/10 display. (See Additional information below.)

Resolution:

Change the base name in ./www_f_eng/bases_links_include and ./baselist_include from "XXX03" to a base which exists in util h/1/10.

Additional Information

util h/1/10 shows the number of records in each base for a particular library. It shows the following for xxx01:

Library report for XXX01
Mon Apr 1 15:07:23 CDT 2013

Checking Library type (tab100)
Demo library for current library is USM01

Z0102 Setup

Number of records per base and Z0102 recommended and current setup

Base	# Docs	Recommended	Current	Conflicts
XXX01	FULL BASE	No	No	
XXX01PUB	NEGATIVE BASE	No	No	
<etc.>				

And this for xxx03:

Library report for XXX03

Mon Apr 1 15:05:11 CDT 2013

Checking Library type (tab100)
Demo library for current library is USM01

Z0102 Setup

Number of records per base and Z0102 recommended and current setup

Base	# Docs	Recommended	Current	Conflicts
XXX03PUB		NEGATIVE BASE		No No

Comparing the two, while "XXX01" appears as a base ("FULL BASE") in the first display, plain "XXX03" does *not* appear as a base in the second.
