## Item change of 'Internal note' not reflected in title index

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 20

---

### Problem Symptoms:

- \* If 'Internal note' or 'OPAC note' are changed in the item, the change is not reflected in the corresponding title index
- \* A following change of the call number triggers the change of the index information for 'Internal note'

### Cause:

Only specific fields trigger the title index to be updated

### Resolution:

The only possibility to update the title index of 'Internal note' / 'OPAC note' is to update a relevant field.

---

## Additional Information

Changes of the following item fields result in title index updates by writing an z07 update record.

- Call number (z30\_call\_no)
- 2. Call number (z30\_call\_no\_2)
