

GDC: Records not deleted

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.1.2
-

Problem Symptoms

- When GDC rule consequence is DELETE, records are not deleted.
- GDC job log has ?Error implementing data change rule.?

Cause

This behavior is the result of Issue 16384-21858.

Resolution

Fixed in Voyager 8.2.2.

Replication Steps

1. In GDC, create a set of records
2. Create a Data Change Rule set
 - a. Condition= Created before May 2013 (includes all)
 - b. Consequence: Record disposition = Delete
3. Add data change rule set to a new rule set group.
4. Preview changes. Note: ?Rule execution causes record to be deleted.?
5. Submit data change job.
6. After job complete, view log. Note: ?[Error implementing data change rule].? Note: Records not deleted.

Workaround

Delete authority records via Cataloging, use BulkImport for bibs.

Category: Global data change (GDC)
