

## Link to Google books is not displayed

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 18.01
- 

### Problem Symptoms:

- \* The link to Google Books (in the OPAC full view) is not displayed at all, or
- \* It is only displayed after clicking a warning "Do you want to view only the webpage content that was delivered securely?"

### Cause:

Google Books API does not support HTTPS connections.

### Resolution:

#### Solution

No solution for HTTPS connections available. If you want to use the Google Books API, you should provide the search and result pages in simple HTTP mode.

---

## Additional Information

See <http://productforums.google.com/forum#!category-topic/books-api/general-discussion/N7aKzDI03pQ> : "Please note that currently our API does not support HTTPS connections."

The results differ in each browser:

- \* Firefox: The API works without problems even under HTTPS.
- \* Internet Explorer: The above-mentioned message is displayed, and only after clicking "No" the Google Books part can be seen.
- \* Chrome: The API does not work at all under HTTPS.
