
Newly-added location missing from OPAC "Location" dropdown

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

A newly-added sublibrary or collection does not appear in a "Location" dropdown in the Aleph OPAC.

Cause:

New location missing from ./www_f_eng files.

Resolution:

Make sure that the sublibrary or collection is in all of the following www_f_eng files:

base-list-include-xxx01
find-include-filter
new-record
sub-library-select-xxx50

Additional Information

If still missing in certain places, then do this:

```
> wf  
> grep 'xxxxx' * <where "xxxxx" is the text of one of the locations which *does* display.
```
