
cir-30: TMPTABLE ... table or view does not exist

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

p_cir_30, being run from the job_list, gets the following error:

```
xxx50.TMPTABLE
```

```
*
```

```
ERROR at line 9:
```

```
ORA-00942: table or view does not exist
```

Cause:

Error in the parameter list of the p_cir_30 submission.

Resolution:

Submit the job via the GUI Services and examine the (by definition, correct) parameters as seen in the \$alephe_scratch job log.

Correct the parameters in the job_list entry.

Additional Information

Depending on the "Group Results by" value specified in the submission \$aleph_proc/p_cir_30 invokes one of the following \$alephm_root/sql_stat/ procs:

```
cir_stat_07_stat_bor_param.sql:
```

```
cir_stat_08_stat_date_param.sql:
```

```
cir_stat_09_stat_itm_param.sql:
```

```
cir_stat_10_stat_mat_param.sql:
```

Each of these sql's does:

```
/* Ensure our temporary table does not already exist */
```

```
drop table &&1..TMPTABLE;
```

```
...
```

```
create table &&1..TMPTABLE
```

```
...
```

```
select
```

```
&&1..TMPTABLE.SUBLIBRARY,
```

```
<etc.>
```

Thus, it would seem that the message could occur in the select if the create fails for some reason.
