

New ledgers not added when click Next in ledger search

- **Article Type:** General
 - **Product:** Voyager
-

Problem Symptoms:

- * Added ledgers or performed Fiscal Period Close (FPC) and new ledgers not appearing where expected when search returns 225+ ledgers
- * Clicking Next does not appear to append new ledgers to results list

Cause:

Next page of results are sorted within existing results - rather than appended to them - when Next button clicked.

Resolution:

Working as designed. Searches can be more specific/granular if smaller results list desired.

Additional Information

In early releases, Next button appended remaining results without ordering them; confusing, as operators would see an initial set sorted alphabetically, and Next would add unsorted results to end of list. Fixed so that now, Next button retrieves next set of results and sorts them alphabetically into initial results, so full set of results sorted together.
