

WEBV: Inconsistent display of next expected issue

- **Article Type:** General
 - **Product:** Voyager
-

Symptoms

The incorrect issue sometimes displays as the next expected issue in WebVoyage

Defect Status

Issue VYG-4893 is fixed in Voyager 9.1.0 and higher.

Replication steps

Example component in Acquisitions > Check - In > Serials Check - In:

- 1 - checked in
- 2 - not checked in
- 3 - checked in
- 4 - checked in
- 5 - not checked in
- 6 - checked in
- 7 - not checked in (next expected issue)

- In WebVoyage, issue 7 displays as the next expected issue.
- Check-In > Serials History > Display in Opac > No for every issue. In WebVoyage, Issue 2 displays as the next expected issue.
- Check-In > Serials History > Display in Opac > Yes for issue 3 only. In WebVoyage, Issue 5 displays as the next expected issue.

Workaround

Display the most recently checked in issue.
