

Call number should be indexed as Other but indexed as Dewey

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 9
-

Problem Symptoms

MFHD 852 first indicator value 1 but 852 subfield h does not contain Dewey-format call number; still indexed as Dewey

Defect Status

Issue VYG-4484 is currently in Development.

Replication steps

1. In Cataloging, create MFHD record with Other call number in 852 (e.g., 852 subfield h = OVERSIZE) but set first indicator value 1.
2. Click Save to DB.
3. Call number indexed as Dewey:
 1. No warning that call number will be indexed as Other.
 2. MFHD_MASTER.CALL_NO_TYPE for MFHD will be 1 (Dewey)

Workaround

Set 852 first indicator value to 8 to index as Other.
