

OPAC keyword search on bib_id fails to retrieve results

- **Product:** Voyager
 - **Product Version:** 9
-

Problem Symptoms

Keyword search by bib_id retrieves no results

Cause

Working as designed.

Resolution

Search in client by bib_id or set up permalinks to specific records with bib_id.

Additional Information

bib_id is stored in 001 tag. Voyager keyword indexes variable MARC fields only (all subfields from 010 to 9xx). 001 does not contain subfields and no valid keyword index can be created for this in System Administration > Search > Indexes - Keyword Definitions.
