## WEBV: oldest issues display in descending order

- **Article Type:** General
  - **Product:** Voyager
- 

### Problem Symptoms:

\*Recent issues display oldest issues in descending order.

### Cause:

This behavior is the result of Issue VYG-5918.

### Resolution:

Issue VYG-5918 is fixed in Voyager 9.1.0.

---

## Additional Information

### Replication steps:

1. Make sure the 1021 code is active in displayHoldings.xml
  2. In 102x\_config.xml set the issue sort order to Descending : `<issueSortOrder>Descending</issueSortOrder>`
  3. In 102x\_config.xml set the number of issues to display to a smaller number than the default 100, 10 for example. `<numberOfIssuesToDisplayPerComponent>10</numberOfIssuesToDisplayPerComponent>`
  4. Check in more than 10 issues of a component.
  5. Search WebVoyage for the component.
  6. The 10 oldest issues display in descending order.
