
IA Book Reader Deployment failed after 4.0 upgrade

- **Article Type:** General
 - **Product:** Rosetta
 - **Product Version:** 4
-

Problem Symptoms:

IA Book Reader Deployment failed after 4.0 upgrade

Cause:

Bug solved

Resolution:

1. Download the war again from Github :

<https://github.com/ExLibrisGroup/rosetta.IABookReader/blob/master/dist/book-reader-viewer.war>

2. Redeploy (dps_stop dps_start)

Additional Information

* It is recommended to deploy the viewer on an external application server, as Ex Libris cannot guarantee future changes to the Rosetta JBoss AS will be compatible with the viewer.

* If changes have been made to the *.war it can be modified to fit the updated version as follows by removing the two problematic files::

- Inside the *.war under WEB-INF/lib is the dps-sdk-3.1.0.jar

- Inside the *.sdk under comexlibriscoredaoejb3 remove the following two files:

GenericSearchEjb3Dao.class

GenericRepEjb3Dao.class

* IA book Reader Documentation: https://developers.exlibrisgroup.com/blog/rosetta_ia_bookreader
