
CAT: ELINK_INDEX not updated for case changes

- **Article Type:** General
- **Product:** Voyager
- **Product Version:** 8.0.0

Problem Symptoms:

- * Change case of one or more characters in link not reflected in ELINK_INDEX
- * LINK_TEXT, LINK and URL_HOST retain former case and row is not updated.

Cause:

This behavior is the result of Issue VYG-5815.

Resolution:

Issue VYG-5815 is resolved for Voyager 9.1.0 and higher.

Additional Information

Replication steps:

1. In Cataloging, identify a record with a link and note the record type and record ID.
2. Find the record in ELINK_INDEX, and note content of LINK, LINK_TEXT and URL_HOST fields.
3. Update link in record by changing case of one or more characters and Save to DB.
4. Review row in ELINK_INDEX again. Note that the row was not updated and LINK, LINK_TEXT and URL_HOST do not contain the updated URL.

Workaround: Fields are populated with the correct case data by a regen of elinks.
