## Changing ARC schema script change\_schema.csh fails

- **Article Type:** General
  - **Product:** Aleph
- 

### Problem Symptoms:

Running script \$arc\_proc/ldap/change\_schema.csh fails with

Enter user name:

ABCR0

Enter new Schema name:

DEFR0

schema found in ARC\_LIBS

sn: Undefined variable.

Cause:

Handling

Resolution:

When prompted to enter the user name, give the relevant LDAP (iplanet) user (e.g. prof1ABCR0, author2ABCR0 etc.)

---

## Additional Information

Example of assigning user author2ABCR0 to schema DEFR0

Enter user name:

author2ABCR0

Enter new Schema name:

DEFR0

schema found in ARC\_LIBS

schema found in ARC\_LIBS

sn=Author

uid=author2ABCR0

cn=author2ABCR0 Author ABCR0

modifying entry uid=author2abcr0,ou=Administrators,ou=TopologyManagement,o=NetscapeRoot
