
SA: Error when updating IP ranges in Access Control groups

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 6.1
-

Problem Symptoms:

? Multiple IP ranges cannot be added to System Administration > System > Access Control Groups without saving after each range is entered.

? When adding a second range the following error occurs: "IP Address Range is overlapping with an existing range: xxx.xxx.xxx.xxx"

Cause:

This behavior is the result of known issue: VYG-4126

Resolution:

This issue has been resolved for Voyager 9.0.0 and above.

Additional Information

Replication steps:

1. Navigate to SysAdmin > System > Access Control Groups
3. Click on 'IP Range' for 'Main Lib', and click 'Edit'
4. Click 'IP Range' tab
5. Add a new range (e.g. Minimum = 131.170.0.0, Maximum = 131.170.255.255), click OK.
6. Add another new range (e.g. Minimum = 144.205.0.0, Maximum = 144.205.255.255), click OK.
7. Error received: "IP Address Range is overlapping with an existing range: xxx.xxx.xxx.xxx"

Workaround: Save between entering each range.
