
Patron Additional ID's not indexed

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

I added some additional ID's through the patron loader I can see them on the patron records in the correct place but they do not appear to have been indexed.

Cause:

Configuration

Resolution:

Change `./tab/tab_bor_id.Ing` of the `usr_library` needs to be changed to allow searching for additional ID of type 05.

Change col. 5 to 'Y' for the relevant line

Example `./xxx00/tab/tab_bor_id.Ing`

```
!1 2 3 4 5 6 7 8 9  
!!-!-!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!-!!-!-!-!-!-!
```

```
05 L Additional ID 05 00 N Y Y Y Y
```

Change to

```
05 L Additional ID 05 00 Y Y Y Y Y
```

Additional Information

See also explanation from the table's header:

```
! COL 5. 1; ALPHA{Y,N}, UPPER; ;  
! GUI;  
! GUI:  
! Can be used as a key to retrieve a Z303 record  
! in the GUI.  
! The value of col.5 in the line for the ID code 00 - System ID may  
! be set to "N" if the value for ID code 01 - Barcode is  
! set to "Y". In this case the system will only look for a  
! patron's Barcode and not for his System ID.  
! This value can also be used for retrieving a Z303 record in the  
! SIP2 server. This option can be activated in tab_sip2.conf by  
! match_id_type = auto;
```
