
My e-shelf to email, text cut off

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 21, 22, 23

Problem Symptoms:

When sending emails from my e-shelf or saving the output locally on the PC the text (mostly the title) is cut off. It doesn't matter which format (MARC, catalog card etc.) you use.

Cause:
Configuration

Resolution:

Table xxx01/form_lng/www-set-mail-00 should be adjusted according to the configuration in standard environment (USM01). A common error is that the numbers listed after 00720 end with "55" or "50", they should end with "00".

Oracle error: io_z34_write
ORA-00001: unique constraint (LSU00.Z34_ID) violated

Additional Information

Example (table from Aleph 22):

S1

+

Date : \$00100

+

When searching our database, you sent a set of records.

+ Global information:

+

- Subject: \$00400

- Name: \$00200

- E-mail: \$00300

- Note: \$00500

+

S2

+

- Note for record is :\$00600

+

S3
