
Items showing up in OPAC regardless of processing status

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 16.02
-

Problem Symptoms:

Despite xxx50/tab/tab15.Ing, there are some items which are not supposed to display, yet they appear in the web OPAC.

xxx50/tab/tab15.Ing is set up to not display items with certain processing statuses (i.e. "In Process").

Although the regular item status are behaving the way they should ("Archival Copy" does not appear and doesn't circulate), the items with non-display processing statuses are displaying when they should not be.

Cause:

Resolution:

In order for the item processing status to take precedence over the regular item status, the entries for processing statuses need to be **before** the regular item statuses in xxx01/tab/tab15.Ing.
