## Upgrade Express: "No libraries are currently defined"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Problem Symptoms:

Despite typing in the libraries in  
"View/Update upgrade parameters",  
2 "Update Parameters",  
2. "Update Upgrade Libraries Definition",  
View Current Parameters shows:  
Libraries to be upgraded:  
No libraries are currently defined

### Cause:

Failure to preserve the "setenv uk\_libraries".

### Resolution:

Initially, "Update Upgrade Libraries Definition" shows this:

```
setenv uk_libraries ""
```

Rather than deleting the setenv, the libraries need to be inserted between the quotation marks, as follows:

```
setenv uk_libraries "abc01 abc10 abc30 abc50 abc60"
```
