

Find search return zero result.

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

- * Find search for WTI(word from title) AND WSB (Sublibrary) for a particular sublibrary code, doesn't find any record
- * In ./xxx01/tab/tab11_word the WTI index is implemented by subfields ace of tag 200 and WSB by subfield 1 of Z30:
200## ace 01 WRD WTI
Z30## 1 01 WRD WSB
- * The search word is present in the subfield e of 200 field
- * The Z30 field is expand ib the bibliographic record by the expand_doc_bib_z30 program in ./xxx01/tab/tab_expand:
WORD expand_doc_bib_z30

Cause:

- * The bibliographic records searched haven't any item record

Resolution:

- * Add an item the bibliographic record to allow the creation of the WSB index

Category: Cataloging (500)
