

base/library locked error again

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

Error message "Base/library locked" appears randomly during search in Web OPAC, although the library is not locked. No error messages in WWW Server log files.

Cause:

clear_vir01 is running every night on hot mode, but has never run on cold mode.

Resolution:

Resolved by running clear_vir01 (util x/8) on COLD mode while Aleph is down.

1. cd \$alephe_root
2. ./aleph_shutdown
3. dlib vir01
4. util x/8
5. cd \$alephe_root
6. ./aleph_startup
