

## ARC report results in 'no data available'

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 2
- 

### Problem Symptoms:

\* I'm having trouble producing a report after trying several different packages within ARC.

I need to produce a report containing:

- \* Patron name/ID
  - \* Patron type
  - \* Patron expiry date
  - \* Total number of loans (current and historical)
- \* as soon field patron type is added, the report displays "no data available"  
\* result is the same for packages LOANS and CIRC AND CASH

### Cause:

### Resolution:

TS\_ARC\_D was full, lacking the space for loan details.  
As a result also the report for patrons fails.

Add space to TS\_ARC\_D (util o/13.3 Add File to Tablepace).

**Category:** Reports (ARC)
