
Subject line of email not taken from form_description.Ing

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

The subject line of an emailed notice should be taken from col. 3 of xxx50 form_description.Ing, but it seems that in some cases this isn't working.

Cause:

Form number omitted from column 2 of form_description.Ing. (In order to have different subject lines for different form numbers, the form number must be included.)

Resolution:

Add the form number to column 2 of form_description.Ing.
