

Circjobs give print location error and don't run

- **Article Type:** General
- **Product:** Voyager
- **Product Version:** 7.2.5

Problem Symptoms:

* Try to run circjob and receive error message:

Missing circ global printing site.

Distributed printing locations must be established through the Voyager System Administrator.

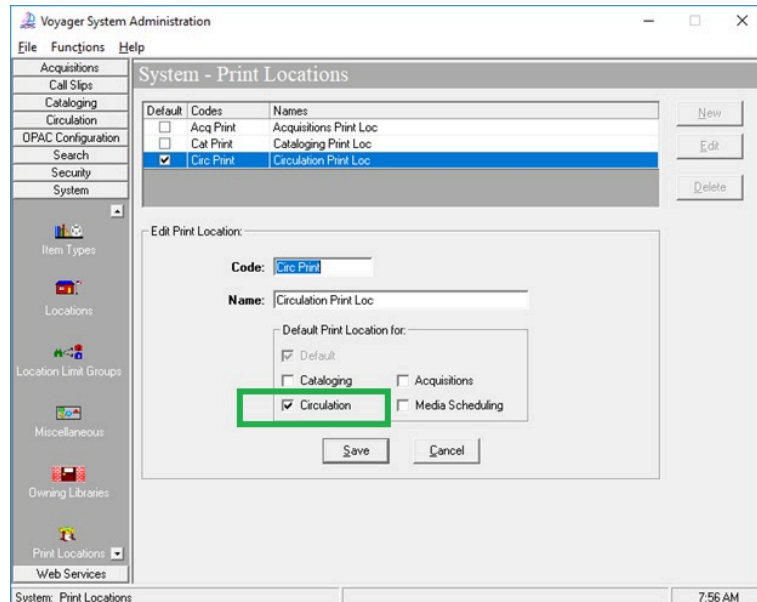

Cause:

There is no global circulation print location selected in System Administration.

Resolution:

1. System Administration > System > Print Locations > [location you wish to use as global circulation print location] > Edit
2. In section "Default Print Location For" check "Circulation".
3. Save.
