

## Base not defined on server"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Problem Symptoms:

The Remote Service Error C1001 message: "Base not defined on server", appears in GUI Search.

### Cause:

Missing base definition or missing Oracle index

### Resolution:

1. If the XXX01 base is missing or commented out in tab\_base.lng, uncomment it. (In addition to XXX01PUB, U-XXX01, etc., there *must* be an entry for the plain "XXX01".)
  2. Check in util a/17/14 to see if the z00\_id Oracle index is present. If not, do util a/17/2 to define it.
  3. Restart the WWW Servers and PC Servers.
