
task in the job_list does not run

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

A new job was added in the file \$alephe_tab/job_list but it doesn't run.
In the log file \$alephe_scratch/<service>.log, an error message is displayed:

```
XXXnn: No such file or directory  
Failed to run job: XXXnn <services>
```

Cause:

The definition in column 3 of the job_list is not correct:

```
S2 14:20:00 N <services.log> XXXnn <services>
```

Resolution:

For services/custom services, the definition in column 3 of the job_list must be Y.

Replace the definition in column 3:

```
From  
N  
To  
Y
```
