

Series titles through WTI search

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

* Subfield \$\$a of 410## field implement WTI word-title index despite the ./xxx01/tab/tab11_word setting
410## a 01 WRD WSR

Cause:

* expand_doc_bib_uni_454 program in xxx01/tab/tab_expand for WORD Expand menu
* This program expands the contents of embedded field as 2001 (title) and indexes it as regular 2001 according to tab11 setting

Resolution:

* Edit ./xxx01/tab/tab_expand
* Remove or comment out the line:
WORD expand_doc_bib_uni_454
* Restart PC Server
* Run Update Word Index (manage-01) service to rebuild the Word Index of the database
