

Cold backup is not starting

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

The backup log file ora_cold_a1_Detail_date_hour.log in /exlibris/backup/logs/ directory contains only the name of the log file

Cause:

The paths in the /exlibris/backup/conf/bkp_init.dat configuration file were pointing to a wrong directory

Resolution:

Correct the paths for a1, a2, a3, a4,a5 and a6 backup type
