## Upgrade Express: "invalid INITIAL storage option value"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Problem Symptoms:

The following error occurs in the Aleph 20 -21 Upgrade Express step 1001:

```
xxx30 Z69_ID Z69
Creating index z69_id in xxx30.
...
...
STORAGE (INITIAL IND NEXT z69_id1 MINEXTENTS 1 PCTINCREASE 0)
*
ERROR at line 2:
ORA-02218: invalid INITIAL storage option value
```

### Cause:

Blank parameters for z69\_id in the xxx30 file\_list.

### Resolution:

1. Correct the following line in the ./xxx30/file\_list:

```
IND z69_id
```

to

```
IND z69_id 1M 1M TS1X
```

2. If the ./xxx30/file\_list has no entry for z69\_id and the \$aleph\_root/tab/file\_list.COURSE is being used and the z69 table is not desired for the xxx30 library, add the following line like to the xxx30/file\_list:

```
NA z69_id
```

This line indicates "Not Applicable" and overrides the line from the file\_list.COURSE.
