
DELETE-SUBFIELD in generic fix deletes fixed fields

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

Setting DELETE-SUBFIELD with field 0## deletes fixed fields

Cause:

DELETE-SUBFIELD is intended for variable fields only.

Resolution:

Use fields 010, 035 rather than 0##. Setting 0## includes fixed fields (001, 005, 006, 007, 008) that do not have subfields, and is inappropriate for DELETE-SUBFIELD.
