

## Universal Catalog is not writing MFHD deletes to deleted.mfhd.marc

- **Product:** Voyager
  - **Product Version:** 8.1.0
- 

### Problem Symptoms

- When an institution deletes or suppresses a record in their catalog, the UC deletes the corresponding MFHD in database.
- Deleted mfhd is not written to /m1/voyager/xxxdb/rpt/deleted.mfhd.marc

### Cause

Universal Cataloging deletes MFHDs via BulkImport. MFHDs deleted via BulkImport are written to delete.imp.YYYYMMDD.hhmm. Manually deleted MFHDs are written to deleted.mfhd.marc

### Resolution

Look for MFHDs deleted via BulkImport in delete.imp.YYYYMMDD.hhmm files.
