
ADAM - automatic clean up of directory \$aleph_dev/apache_media

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

The directory \$aleph_dev/apache_media contains temporary files from module ADAM

The files are not deleted automatically

Cause:

The utility deleting the temporary files has to be added to job_list to be executed by the job daemon

Resolution:

1. add the following lines to \$alephe_tab/job_list

```
!* clear apache_media without batch queue
```

```
00 00:45:00 N clean_ux06.log csh -f /exlibris/aleph/a20_3/aleph/proc/util_x_06 no_questions
```

2. reload the changed job_list file via util e/16/9 Reload job_list/job_list.conf in jobd

Additional Information

* the example above is for a clean up of directory \$aleph_dev/apache_media, sunday at 00:45 * it is based on util x/6 Clean apache_media * the job creates a log file \$alephe_scratch/clean_ux06.log_ is the process id
