

item-12 job doesn't finish

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

The item-12 job ("Clean HOL number from Item "), submitted from xxx01, fails to indicate its completion in the \$alephe_scratch log or in the Task Manager --> Batch log (which is reading the z100 record).

"ps -ef | grep item_12" shows that after a day it is still running (-- and continuing to use CPU).

Cause:

Job submitted for BIB library instead of ADM.

Resolution:

- * Kill the processes shown in the "ps -ef | grep"
- * Connect to xxx01 and bring up the submission screen.
- * In the "Library" dropdown at the bottom of the screen select the ADM library.
- * Click Submit.

Additional Information

p-item-12.xml added to the GUI Circ -- Services menu with v21 rep_change 2235.
