Problem Symptoms:

* When I open Acquisitions or Cataloging module error Global-93 : unable to locate remote file is displayed

* Searching in the GUI results in the following error in \$LOGDIR/pc_server_nnnn.log:

```
Load: /tmp/utf_files/exlibris/aleph/u18_1/tcu01/tab/tab00.eng

illegal term
aleph_ccl_expr_check_tree_c - illegal expr
aleph_ccl_expr_check_tree_c failed
aleph_ccl_expr_build_normal_tree_c failed
```

Cause:

file permissions in \$utf_files

Resolution:

1. Change permissions in \$utf_files
2. Shutdown aleph as root user
3. Re-started as user aleph
