
sdi-01 retrieves no results (ue11 not running)

- **Article Type:** General
 - **Product:** Aleph
-

Problem Symptoms:

*SDI - Selective Dissemination of Information (sdi-01) returns email messages indicating the service has "retrieved no results".

* In SDI profiles, the SDI search always shows 0 results.

Cause:

ue_11 must be active in the USR library in order to process z105 records and generate z324 records

Resolution:

1. Use the following SQL to determine if there are z105 requests waiting to be processed by ue_11:

```
usrXX@ALEPHXX> select Z105_REC_KEY, Z105_TARGET_LIBRARY, substr (z105_text,1,70) from z105;
```

2. Run the following command in the usr library (\$data_scratch) to determine when ue_11 last ran:

```
>> ls -lrt *run_e_11*
```

3. If unprocessed z105 records exist and ue_11 is not active in the usr library, activate it using util e/11

Additional Information

Use the following command to locate the usr library: >> echo \$z105_library See also KCS article 16384-56082: sdi-01 retrieves no results (missing SDI sublibrary)
