

ARC: Duplicate or old orders in Acquisitions reports

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 2
-

Problem Symptoms:

Wrong results (duplicate entries or old data) are displayed in Acquisitions package in ARC when adding bibliographical information (such as Title).

Cause:

Acquisitions package is obsolete and should not be used, or should be used for limited reports.

Resolution:

Two new packages have been introduced:

Use the new packages:

- Acquisitions Orders
- Acquisitions Budgets

Use package 'Acquisitions Budgets' in this case to get the correct results.

Additional Information

See the following documentation: 'ARC 2.0.0 User Guide', section 'Which Package Do I choose?' 'ARC 2.0.0 Logical model', chapter '4.2 Content per New Packages'

Category: Reports (ARC)
