## ORA-01653: unable to extend table XXXnn.Z105H by 8192 in tablespace TS

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Problem Symptoms:

In ALEPH logs there are error messages:

ORA-01653: unable to extend table XXXnn.Z105H by 8192 in tablespace TS

### Cause:

The Oracle tablespace ran out of space.

### Resolution:

1. Check the tablespace that is out (or almost) out of space with util o/14/1.
2. Check the data file(s) that are in that tablespace with util o/13/1
3. Check that the free space on the filesystem where the datafile is enough for the data file enlargement (or file addition).
4. Enlarge the data file with util o/13/2.

---

## Additional Information

Normally the data files are up to 4Gb; if you need more free space add a new data file to a tablespace using util o/13/3.

**Category:** Cataloging (500)

**Subject:** Create / Edit records (500)
