

## item\_stat\_code\_code\_idx not unique after upgrade

- **Article Type:** General
  - **Product:** Voyager
  - **Product Version:** 8.1.2
- 

### Problem Symptoms:

\* Upgrade engineer reported that index item\_stat\_code\_code\_idx could not be created as a unique index on the item\_stat\_code table after upgrade.

### Cause:

Item statistical category codes are not unique.

### Resolution:

1. Give each item statistical category a unique code.
  - a. Log into System Administration.
  - b. Navigate to System > Statistical Categories > Item tab.
  - c. Highlight one of the categories and click Edit.
  - d. Edit the code to be a unique 3-character code.
  - e. Save.
2. Repeat steps 3-5 until all categories have unique codes.
3. Open an incident with Voyager Support to have item\_stat\_code\_code\_idx rebuilt as a unique index.
