## sip2: patrons with fines are allowed to borrow materials

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Problem Symptoms:

The sip2\_server allows patrons with fines to borrow materials even though the patron's cash total exceeds the z305\_cash\_limit.

(Note: the z305\_cash\_limit can be seen in the GUI Circ Patron - Local Patron values.)

### Cause:

Entry missing from tab\_check\_circ.

### Resolution:

The blocking of loans due to excessive fines is performed by the following tab\_check\_circ checks:

! 5 : check patron cash limit  
! checks whether the patron has exceeded the amount allowed  
! in z305\_cash\_limit - uses O(pen) and T(ransferred) transactions  
! 5\_b: check patron cash limit  
! checks whether the patron has exceeded the amount allowed  
! in z305\_cash\_limit - uses only O(pen) transactions and not T(ransferred)

Add the following to each xxx50 tab\_check\_circ:

SIP-AUTH check\_circ\_5\_b

---

## Additional Information

KB 8192-2696 (sip2\_server: how to display "patron card expired" message) is similar.
