

get_ora_passwd: open: Permission denied

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20, 21, 22, 23
-

Problem Symptoms:

Using the dlib XXXYY command I get the message:

```
> get_ora_passwd: open: Permission denied
```

Cause:

Password file has only read permissions

Resolution:

Change the permissions on the /exlibris/aleph/ora_aleph/ora_passwd_aleph1 file

from:

```
-r-----
```

to:

```
-rwxrwxrwx
```

Example: `chmod 777 ora_passwd_aleph1`

(Note: This can't be done as the aleph user; must be done as root.)
