
ret-01 with Last Update Date To < 2010 gets no results

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

ret-01 ("Retrieve Catalog Records") with Last Update Date To < 2010, retrieves no records -- even though there *are* records older than 2010.

Cause:

ret-01 submitted with zeros for open-date's.

Resolution:

Make open-date's legitimate dates.

To make the creation date not be considered (just the Last Update Date) all open-dates need to be allowed :

```
setenv p_open_date_from "yyyymmdd" <where yyyymmdd is the date of the oldest record in the system>  
setenv p_open_date_to "yyyymmdd" <where yyyymmdd is today's date>
```

Additional Information

The open-date's as seen in the original \$alephe_scratch job log (prior to correction):
setenv p_open_date_from "00000000"
setenv p_open_date_to "00000000"
