

## p-print-03: fix\_doc\_script.gnt error

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Problem Symptoms:

Running a p\_print\_03 with a fix containing a large number of replace-string statements I seem to be hitting a limit...

500 or more replace-string's results in an empty output and a error message in the logfile

Execution error : file '/exlibris/aleph/a20\_1/aleph/exe/fix\_doc\_script.gnt'

error code: 114, pc=0, call=1, seg=0

114 Attempt to access item beyond bounds of memory (Signal 11)

Remaining below 500 there's no problem

### Cause:

This is a limitation in the program.

### Resolution:

This problem is solved in Aleph 21 with rep\_change #000073.

**Category:** Background processing (500)

**Subject:** Batch (500)
