

GDC log stops at Transform step

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.0.0
-

Problem Symptoms:

* Submit Data Change job and log stops at transform step:

INFO - Start Transforming records...

INFO - Transform 1 Elapsed Time: 00:00:00

* Check jobd.log.<date> under /m1/voyager/xxxdb/log and see error logged:

```
2013-02-14 10:56:28,243 28303916 [main] ERROR com.exlibris.voyager.jobd.JobExecutor - Job Failed to run properly:
Unable to find com.exlibris.voyager.model.Library with id 0
```

Cause:

One of the locations in database does not have required Owning Library selected. Please note: any location in the database can cause the error, **even if it is not used in any of the records affected by the GDC transaction.**

Resolution:

1. Open System Administration > System > Locations.
2. Highlight affected location.
3. Click Edit.
4. Select an Owning Library from drop-down.
5. Save.

Additional Information

If not sure which location is missing Owning Library, query LOCATION table: select * from LOCATION where LIBRARY_ID=0;

Category: Global data change (GDC)
