

## OVID target linking to login screen

- **Article Type:** General
  - **Product:** SFX
  - **Product Version:** 4
- 

### Problem Symptoms:

When linking to OVID from SFX, user is taken to login screen instead of content

### Cause:

The flag value of \$\$IPAUTH Linking Parameter is missing value: "yes"

### Resolution:

- 1) Find problematic OVID target in the Targets table of SFX KBManager
- 2) Click on the "S" button for the target to reach the target service level.
- 3) Click on the "L/P" button to reach the Linking Parameter table (it will open in a new window).
- 4) Edit the \$\$IPAUTH field in the Linking Parameter table and enter "yes" (without quotation marks).
- 5) Click "Submit"
