

## Fund does not show commitments

- **Article Type:** General
  - **Product:** Voyager
  - **Product Version:** all
- 

### Problem Symptoms:

Fund never shows any pending or total commitments; when invoiced, pending and total expenditures do display

### Cause:

Expend Only box is checked for the fund; when this is the case, commitments will never display

### Resolution:

1. Uncheck Expend Only in the Fund (checkbox in Fund header underneath End Date) -- this will allow future commitments to display
2. Run the FullFund scripts in order to have previous commitments display (see [What do the FullFund scripts do](#) if you have not previously run the scripts in question)
