

## Job daemon won't start; "No jobs in file"

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Problem Symptoms:

\*util e/15/3 shows that the job daemon is not running.

\*When using util e/15/1 to activate job daemon, there is no error message, but util e/15/3 still shows no job daemon running.

\*The \$alephe\_scratch/jobd.log has the message "No jobs in file".

### Cause:

\$alephe\_tab/job\_list file is empty or all the jobs are commented out.

### Resolution:

Check the \$alephe\_tab/job\_list file for jobs that are commented out and make sure there are jobs that can run.
