

read_http_header: recv errno Connection reset by peer

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Problem Symptoms:

The OPAC interface is not working and in the www_server log there are many read_http_header: recv errno Connection reset by peer lines

Cause:

Apache server is not working but it's still up.

Resolution:

Restart the Apache server with:

1. apcb
2. apachectl stop
3. apachectl start

If Apache is running on port 80 point 2 and 3 must be executed from root.

Category: Web OPAC (500)
