
Pjobd in maintenance mode & doesn't clear or start

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.1.2
-

Problem Symptoms:

- Cannot access GDC
- Pjobd process is not running
- Pjobd appears to be in maintenance mode:
svc:/site/ExLibris/Voyager/xxxdb/Pjobd:default (Voyager xxxdb Pjobd Service)
State: maintenance
Reason: Start method exited with \$SMF_EXIT_ERR

Cause:

Pjobd is in maintenance mode

Resolution:

1. Log into the Voyager server as the voyager user
2. cd /m1/voyager/xxxdb/log/
3. Remove the PID file: rm jobd.pid
4. Clear Pjobd out of maintenance mode & bring it online: svcadm clear Pjobd
5. Verify that Pjobd is online in SMF: svcs -a | grep Pjobd
Sample output: online 11:04:23 svc:/site/ExLibris/Voyager/xxxdb/Pjobd:default
6. Verify that Pjobd is running: ps -ef | grep jobd
Sample output: voyager 20761 1 0 23:12:51 ? 0:58 java -Dlog4j.configuration=<file:///m1/voyager/xxxdb/ini/jobd-log4j.properties>
